

Veripos Wins Positioning Contract

UK-based companies NCS Survey and InterMoor have awarded Veripos a new three-year contract for provision of GNSS positioning services. The contract will be in support of their respective activities, particularly in and around the North Sea and Brazilian offshore sectors.

Facilities to be supplied include a full range of proprietary satellite positioning capabilities, including the company's latest Apex2 service utilising Precise Point Positioning (PPP) methods in conjunction with both GPS and Glonass constellations. A range of modular hardware comprising versatile integrated mobile units which can be configured to accommodate a wide range of positioning solutions will also be provided, together with suites of processing software for determining and validating quality control data.
