

# Videoray Pro 4 ROV

The new VideoRay PRO 4 ROV is the latest model in the top of the line Professional series and offers a deeper depth rating, hydrodynamic improvements, brushless thrusters and much better camera and lighting compared to its ancestors. New sensors, including a 3D compass and MEMS gyro have improved navigational capabilities.

The primary video camera features ultra-low light and Wide Dynamic Range, and coupled with the very high intensity LED lighting, the video camera can capture far clearer footage and stills, particularly in difficult lighting conditions.
