

# VideoRay ProIII MicroROV

VideoRay announced the VideoRay Pro III, the next generation of its remote control video camera for short- or long-term monitoring in aquatic environments down to 500 feet deep (152m). Now, the 8-pound microROV can be computer controlled from a laptop PC, opening new possibilities for gathering and analysing data. The VideoRay Pro III can host sonars, positioning systems, hull inspection software, thickness gauges, manipulators, and radiation sensors that can be quickly installed and configured in the field in minutes.
