

# Xylem Appoints UK Marine and Coastal Director

Water monitoring specialist Xylem Analytics UK has appointed David Goldsmith as director of Marine and Coastal Business. He will be responsible for bringing the YSI, SonTek and AADI brands together under the Xylem Analytics umbrella.

David has extensive experience in marine technologies, having worked closely with AADI for many years in the oceanographic sector. He finds this is an exciting opportunity as each of these three brands is a major player in the oceanography market and the new division will therefore provide a broader capability to meet the marine monitoring requirements of Xylem's customers.
