

SeapiX-C: 3D solid-state volume sonar for high-precision marine works

10-minute product presentation followed by a Q&A session. We recently unveiled our new SeapiX-C solid-state 3D multibeam sonar dedicated to high-precision marine works. Providing increased efficiency and safety, this new sonar offers real-time georeferenced static bathymetry capabilities to marine works operators for instant monitoring and decision-making. Watch this webinar to learn more.
